

November 2025 Cybersecurity Tip: Holiday Shopping

As the holiday shopping season begins, be extra cautious when visiting websites and making online purchases.

- Make sure websites are trusted and secure.
- Beware of websites or social media scams offering deals too good to be true.
- Be cautious of phishing emails that may contain fake deals or ask you to contribute to fake charities.
- Ensure software on all of your devices are up to date to ensure the latest security update is being applied.
- Use strong passwords and multi-factor authentication.
- If possible, use credit cards when shopping since they offer added protection over debit cards.
- Monitor your bank accounts closely for any suspicious activity.

Key takeaway: Be diligent when online shopping this holiday season to avoid online scams.
